MATTHEW MCCORD

SOFTWARE DEVELOPER

EXPERIENCE

APPRENTICE DEVELOPER
Nashville Software School 2016-2017
- Six month, full time immersive bootcamp emphasizing full stack developement.
- Front end emphasis on HTML, CSS, JavaScript, jQuery, and Angular, culminating with a front end capstone project.
- Back end emphasis on Python, SQL, Django Framework, and Agile software development through the SCRUM process, culminating with a full stack capstone project.
- All six months included extensive use of git and github in many individual and group projects.

LINE COOK, PREP, FILL-IN MANAGER
The Wild Cow Vegetarian Restaurant 2010-2016
- Delivered items on time and under pressure.
- Prepared backups of food items for later use.
- Installed the new POS system that incorporated handheld iPads for server use
- Go to guy for any tech problems in house.

PROJECTS

DEFEND THE CASTLE
- Nashville Software School - Capstone Project
- A fast-paced arcade-style twist on the classic tower defense genre. The engine and game are written from scratch in JavaScript using Require.js for modularization, Class.js for JS Class extensions, and a third party Sound.js library.

WAVES '87: BUSINESS CRUIZIN'
- Global Game Jam (Nashville) 2017
- Made in 48 hours with a five man team. Waves '87 is a graphic novella, using RenPy for Python, chronicling the adventures of a Kawa, a businessman loathed by his peers and about to be fired from his job. A chance encounter with pirates may just turn his life around...
